We purchased this bull in the 2012 No Bull Sale to use on heifers and he has done a tremendous job. If you are looking for a solid red, polled and proven bull, here he is. We have 20 calves sired by him (all polled) and are consigning one of his first calves to show what he can do. Updated photos at www.martinellshorthorns.com

Selling 2/3 interest and possession. Red, polled, asterisk free performance pedigree and outcross genetics. We have used this bull on a wide range of cows looking forward to his first calves this spring. That’s why we choose to retain semen interest. The dam of Redline is gone now but her genetics will continue to impact the Shorthorn breed. Sutherland Margie 714 performance dam and natural mother of Sutherland Durango 813 and natural mother of Redline.

CE: 0.3; BW: 1.0; WW: 19; YW: 29; Mlk: 4; MCE: -3.6; CWT: -5; REA -0.06; FAT: 0.03; Marb: 0.13; SCEZ: 10.26; SF: 31.71; SBMI: 39.96

Retaining a 1/3 in herd semen interest. Are you ready to genetically propel your herd forward? Injun Jo is extremely deep sided with loads of internal dimension and capacity. He is skeletally extended from end to end and stout features with tons of natural muscle shape and expression down his top and through his quarter, while maintaining a long fluid stride. Injun Jo was a class winner at the NAILE, Grand Champion Bull at the 2013 West Virginia State Fair, and is currently the All-American Summer Yearling Bull point leader. With a profitable future in mind, select Injun Jo for your next herd sire. BW: 86 lbs.

Retaining a 1/3 in herd semen interest. Look no farther, Cochise is your next polled, calving ease sire! We have been confidently using his calving ease sire. Homedale Blizzard on heifers, for years with fantastic results. Blizzard’s progeny always have low birth weights, are structurally sound and are extremely functional. The Blizzard daughters make tremendous, low maintenance brood cows. There are generations of maternal excellence in Cochise’s pedigree. Cochise was the Senior Calf Champion Bull at the West Virginia State Fair and was second in class at NAILE. Select Cochise with confidence! BW: 73 lbs.
Here is the first Red Stallion bull to sell at auction. When you see him you will understand why we flushed his dam back the same way. This stout made bull has a good top and moves out real well. With the way he is bred on the bottom side it further assures his ability to produce good females. BW: 96 lbs.

Bred to Sutherland 813 75W 1512 *x; due to calve 4/9/14. An outstanding bred heifer from our Janet cow family. Gauge works really well on our cows. This one will make a great addition. The 1512 bull impresses every one that sees him. 1512 *x4190159 study his pedigree online.

If you need a functional, no-nonsense female to your herd, look no further, Splash Gal should be your next purchase. Polled, sound structured, free moving and correct in her lines, Splash Gal is adequate in her muscle shape and expansive about her rib cage. Her phenotype alone makes her an attractive breeding package and her genotype only adds to her potential. Splash Gal is sired by a superior calving ease bull that produces sound, productive cattle. Combined with generations of productive cattle on the bottom side, you can’t miss with this pedigree! Splash Gal sells open, ready to breed for a January calf, to the sire of your choice. CHV.
